

Associated Gaskets

Solutions for Industry

Gaskets & Sealing Products

AG is Australia's Largest Independent Gasket & Sealing Company.

We work with materials from leading manufacturers to provide you with the best sealing solution for your application.

Combined with our decades of experience and versatile fabrication facilities, we can assist with all your sealing requirements.

Comprehensive Range of Products

Our range of sealing solutions has all types of applications covered. We stock everything from industrial rubber sheets through to compressed fibre (CNAF) materials, metal gaskets, specialised PTFE sheets and quality sealing tapes and adhesives.

Each of these material types is available in a selection of grades and/or configurations and we will work with you to identify the best one for your sealing requirements.

The Benefit of Experience

We have been making seals for Australian industry since 1965. Over the years we've developed extensive knowledge and use this to help you achieve the best result possible.

In-House Fabrication

Whether you need a gasket urgently, or a seal made to exacting standards; the fact that our materials and fabrication are under one roof will help.

Huge material stocks and agile fabrication allows us to work to tight deadlines. Our in-depth knowledge of our machines and materials ensures that critical production quality standards are achieved.

- Rubber Elastomers
- Compressed Fibre
- PTFE Materials
- Cork Gaskets
- Metallic Gaskets
- Compression Packings
- Sealing Tapes & Adhesives
- O Rings
- Moulded Parts and Extrusions
- Gasket Cutting Tools and Equipment

Large Stock Holdings

Thermal Insulation

When You Are Working With Extreme Temperatures, You Need Insulation You Can Rely On.

Our range of quality thermal insulation products has been created to cover all types of temperature and insulating requirements.

Whether you need to protect personnel from high temperatures or shield critical equipment from freezing conditions, we can assist.

A Selection of Insulation Types

Regardless of the conditions; Associated Gaskets Thermal Insulation Range has your requirements covered.

We stock a large assortment of different material types. This includes a selection of woven tapes and cloths, rigid boards which can be supplied as sheets or cut to suit your requirements and a variety of heat resistant sleeveings, ropes, blankets, batts, flexible papers, adhesives and compounds.

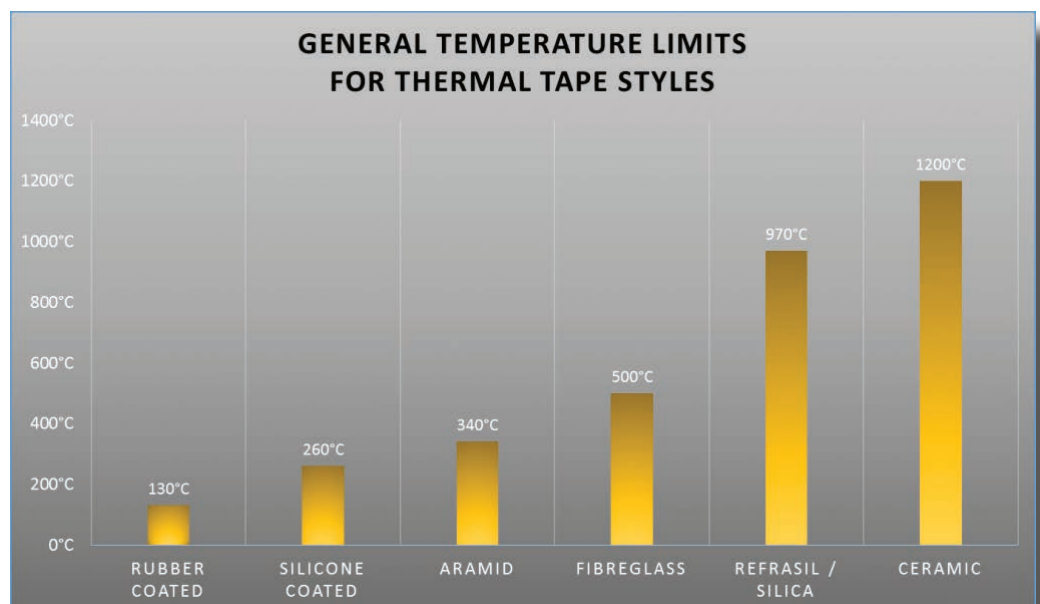

Materials for All Requirements

We understand that high temperature means different things to different people. We've developed our range of insulation materials to cover all definitions. Available fibre types include everything from rubber coated grades and Aramid through to premium quality silica and ceramics. For many applications, Fibreglass is still the insulator of choice and this is stocked in an enormous array of product forms, grades and types.

Fabricated to Fit

Sometimes, an application requires a custom insulation solution made from a number of different materials.

We will work with you to design and produce the best product for the job. Our in-house team has years of experience producing covers, expansion joints, blankets and more for the most demanding industrial applications.

Adhesives & Sealants

If A Material Connection Can Be Bonded, Our Range of Glues, Sealants and Adhesives Will Have a Solution.

This quality range of adhesives has been selected to offer unrivalled quality, reliability and performance.

We can offer solutions for everything from metal repair and lining through to the bonding of LSE plastics and exotic material types.

Technical Advice & Support

Creating a strong, lasting bond requires more than just a compatible glue. Our team is extensively trained in all aspects of a bonding application and can provide support in selecting adhesives that satisfy all the requirements.

Temperature, dynamic loads, humidity, cohesive strength and more can all be factored in.

We augment our own experience with access to experts around the world so you can be sure of the best outcome for you bonding application.

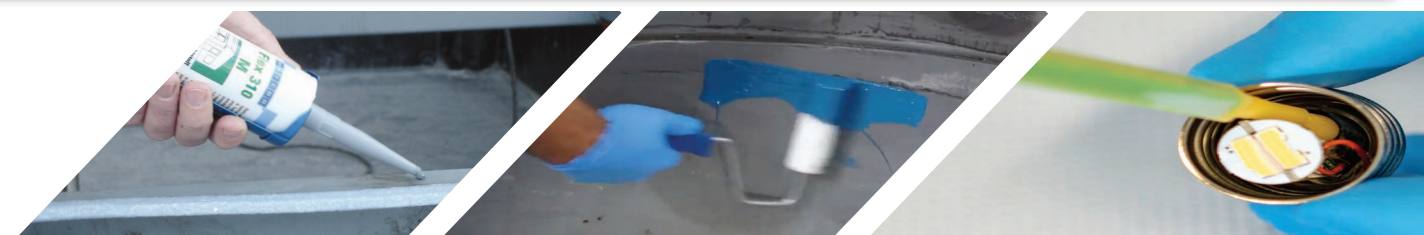

Adhesives for Demanding Applications

We know from experience that the demands industry put on adhesives can be a little different. Our range includes multiple types for these complex situations.

We have products able to be powder coated, glues for bonding PTFE and metal filled epoxies for rebuilding damaged parts.

Specialised solutions are available for bonding underwater, preventing abrasion in high wear environments, the encapsulation of electrical equipment and much, much more.

- Plastic Metal Epoxy Systems
- Acrylic Structural Adhesives
- Weiconlock Threadlockers & Retaining Adhesives
- Contact Adhesives
- Silicone Adhesives, Sealants & Compounds
- Urethane Adhesives & Compounds
- MS Polymer Adhesives & Sealants
- Epoxy Adhesives
- Cyanoacrylates / Super Glues
- Quick Repair Putties
- Primers and Dosing Aids

Anti-Seize & Lubrication

Reducing Friction and Limiting the Potential for Parts Seizing Is Crucial for Efficient, Cost Effective Operations.

Our All-Round Lubricant and Anti-Seize Products are each designed to provide long lasting performance in industrial applications.

Various types are available to suit requirements such as high temperature, food grade certification, dielectric properties and more.

Anti-Seize Products Designed for Industry

For anyone working with highly stressed mechanical parts and fasteners, a quality assembly paste can be critical. Our range of Anti-Seize solutions all effectively protect against wear and seizure whilst simultaneously preventing corrosion, stick-slip phenomena, oxidation and fretting corrosion.

This all adds up to easier disassembly and less chance of premature failure due to degradation of the fastener.

High Performance Greases

Our range of All-Round Lubricants includes everything from general-purpose industrial varieties, to high temperature greases, lubricants with NSF approval for food preparation areas and even a specialised grade for underwater or wet area use.

All of these are available in various pack sizes so you can select the one that best meets your requirements.

Our All-Round Lubricant range features extremely long re-greasing intervals and is supported with comprehensive information to ensure that you can quickly and easily make the right selection.

Industry Leading Range

We are pleased to stock and supply Australia's most diverse range of tape products.

We work with world-leading material manufacturers such as 3M, Isovolt, Stylus, Husky, Weicon, DuPont and many more to ensure that all applications are covered.

Whether you need quality masking tapes, high temperature insulation or class 1 reflective; we have a solution. We couple this range with years of experience and are ready to help you with your taping needs.

Associated Gaskets' Range of Tape Products is Used In All Areas of Industry.

Our comprehensive range includes tapes for mounting, sealing, insulating, and reflecting plus many, many more.

Whatever type of tape your application requires, our large stock holdings, in-house fabrication facilities and experienced team ensures that we will be able to assist.

In-House Tape Conversion

Not only do we stock an enormous range of tapes, we cut many of them to size ourselves.

With this capability, we are able to offer our customer the choice between standard or custom width tapes. Whether you require a very narrow insulation tape for fine work, or a ultra-wide reflective part for your site; we can assist.

Technical Sprays & Liquids

Having The Right Product On Hand For Cleaning, Lubricating, Sealing, Bonding or Protecting Can Make A World of Difference.

Our range of Technical Sprays & Liquids includes a large variety of different types of industrial grade products.

Solutions are available for applications as diverse as rust prevention, leak identification and specialised cleaning.

Quality You Can Rely On

Our large selection of various sprays and liquids all have one thing in common: quality.

We understand that though they are simple on the surface; the role they play in your operations is often extremely important.

Whether you are protecting equipment from corrosion, cleaning surfaces before bonding or ensuring parts remain lubricated and machines keep running; you can rely on our solutions to get the job done.

Continuous Innovation

Every year, new products are released to meet emerging challenges and requirements. We, along with our worldwide partners, monitor these developments closely.

As new products prove their capabilities, we constantly evaluate their fit. By doing this, AG can ensure that you are always offered the latest innovations that may suit your requirements.

- Surface & Corrosion Protection
- Cleaning & Degreasing
- Care & Protection
- Solvents & Separating
- Electrical Insulation
- Lubricating & Multi-Functional
- Adhesive Lubricant & Grease Sprays
- Spray Adhesives
- Dispensing Tools & Aids.

Specialised Industrial Products

Hard To Find, Critical Industrial Products Are One Of Our Specialties.

We constantly work with our customers to identify new requirements and find solutions to keep their operations efficient, safe and economical.

We now stock a range of specialised tools, safety solutions, marine bearings and more. We welcome the opportunity to work with you on your bespoke product needs.

A Range That Evolves To Meet Your Requirements

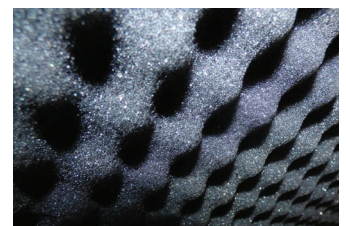

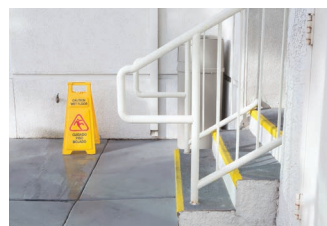

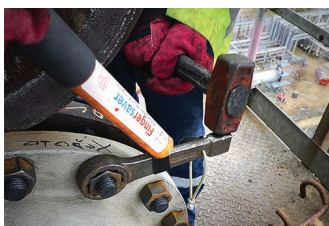

Over the years we have developed close, collaborative relationships with our customers.

As their needs have grown and changed, so has our range of products. We have always prioritised assisting our clients when adding new products and welcome the change to assist you with any you are having trouble sourcing reliably.

One Stop Shop

Our product range is vast - over 300,000 items and growing. We long ago became more than a gasket company and are now proud to offer one of Australia's most diverse industrial product selections.

Whether you require quality 3M grinding discs or a custom-made gasket for corrosive media; we have the stock, experience, capabilities and most importantly, commitment to service to assist.

- Welding Blankets
- FingerSavers
- Acoustic Insulation
- Anti-Slip Materials
- Skeg Marine Bearings
- Hose Clamps
- Flange Spray Shields
- Specialised Tools
- & Much, Much More

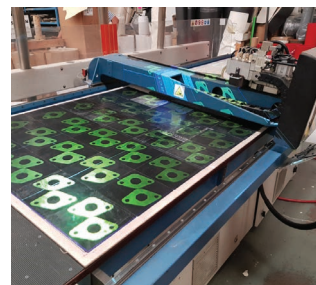

Other Services We Provide

Cutting Services

As a full service fabrication facility, we are able to provide a range of cutting services to customers wishing to convert their own materials. These include waterjet cutting, knife cutting, laser cutting and die and kiss cutting.

Using these methods, we are able to cut almost any material quickly and precisely. We can cut everything from simple shapes to complex, computer generated designs.

Using the full breadth of our equipment, almost any material type can be cut to meet the most demanding of requirements. For more info, please do contact your local AG branch.

- Waterjet Cutting
- Hydraulic Press Machines
- Die & Kiss Cutting
- Laser Cutting
- CNC Oscillating Knife Machines
- Routering

Fabrication Services

Besides cutting AG also performs a range of other types of fabrication including Tape Slitting, Sewing, Machining, Moulding & Extruding.

Our Tape Slitting Service is used for converting larger “log” rolls of material into narrower individual rolls. This allows us to offer custom widths on most tapes.

We also operate a rewind slitter allowing us to roll larger rolls down to shorter lengths to avoid wastage of material.

Our in-house Sewing Department is able to fabricate our range of thermal insulation cloths, batt and tape into custom made welding blankets, thermal jackets and shields, bellows, expansion joints and other individualized components.

We also operate a fully equipped machining department which performs turning, drilling, boring, milling, grinding, sawing and thicknessing allowing limitless customization in industry-leading turnaround times.

Other Services We Provide

Detailed Product Information, Documentation and Guides

Our ever growing and expanding website includes detailed information on our vast range of products.

Here you will find over 1,000 TDS, SDS, Info Sheets and other product specific information.

You will also find size and selection guides on everything from copper magnet wire to table gaskets and epoxy adhesives.

Here are some of the industries we currently serve:

- Automotive
- Chemical & Petrochemical
- Defence & Military
- Electronics
- Food, Beverage & Pharmaceutical
- Government & Education
- Construction
- Manufacturing
- Tradespeople & Contractors
- Transformer & Switchboard Manufacturing
- Waste, Water & Underground Services
- Mining
- Marine & Shipbuilding
- Oil & Gas
- Power Generation & Renewable Energy
- Road, Rail & Transport
- Wholesalers & Industrial Supply

Australia's Most Comprehensive Stock Holdings

We understand the importance of having stock on hand. For decades, we've expanded our range of stocked products so that we can assist with urgent requirements for even the most exotic of materials.

While many companies seem to be moving towards keeping less and less stock, we remain proudly different. In our network of warehouses you will find everything from extra large gasket sheets through to 100mm thick epoxy insulation, bespoke extruded seals and all kinds of other industrial products.

If your requirement is urgent, we will do everything we can to assist no matter the timeline.
