

Refrasil Sleeving

Thermal Ropes & Sleeveings

Thermal Cloths

Rigid Thermal Insulation Boards

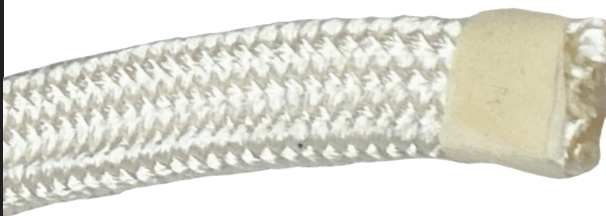

Thermal Insulation Tapes

AG's Refrasil Sleeveings are braided from high purity silica fibres whist have been specially treated, pre-shrunk and texturised.

The resulting sleeveings are absolutely fireproof, resistant to oxidation and most corrosive solutions all while providing excellent insulation performance in applications reaching 982°C.

Available in both standard and heavy wall varieties, AG's standard wall Refrasil sleeveing is particularly versatile as it can be stretched over a wide variety of cable or hose sizes whilst the heavy wall (1.65mm as opposed to 0.8mm) will provide maximum thermal protection.

Made in the USA using very high purity silica fibres, Refrasil Sleeveing is trusted around the world in the most demanding of heat insulating applications.

Key Specifications	
Temperature	982°C
Colour	White
Silica Content	96% SiO ₂
Abrasion Resistance	Strong

Standrd Sizes			Standrd Sizes		
ID (Metric)	ID (Imperial)	Wall Thickness	ID (Metric)	ID (Imperial)	Wall Thickness
10mm	3/8"	1.5mm	25mm	1"	0.8mm
12mm	1/2"	1.5mm	65mm	2 & 1/2"	0.8mm
