W44T Spray is a high quality, general purpose protection, lubrication, preservation and cleaning spray used in a wide variety of industrial applications.

Made from a specialised formula with excellent creep properties, this multifunctional spray offers good resistance to corrosion and resists water whilst also serving as a lubricating agent and cleaner.

W44T Turbo Power Spray is used in an almost infinite range of applications. Some of the most common include:

- Loosening of seized screw connections, bolts, fittings and valves.
- Penetrating & dissolving rust.
- Dispelling moisture from electrical contacts.
- Preventing leakage current and simplifying the starting of wet motors.
- Eliminating squeaking and creaking hinges, guides, bearings, joints & couplings.
- Cleaning dirty metal surfaces (leaves a thin film that does not smear, slick or attract dust).
- Protection of tools, machines and electrical & mechanical precision instruments.

Key Specifications	
Colour	Yellowish
Temperature Resistance	-50°C to +210°C

Standard Sizes

- 400ml Standard Aerosols
- 500ml Double Nozzle Spray Cans
