3M™ 2214 Paper Tape

2214 is a general purpose paper masking tape used for holding, bundling, sealing and non-critical masking applications.

Manufactured by 3M™, 2214 consists of a crepe paper backing and a rubber based adhesive. 2214 offers good adhesion to steel and low-stretch characteristics, coupled with quick adhesion, high conformability and sliver resistance. It is hand tearable and available from AG in standard rolls of 54.8mtrs.

3M™ 2308 Performance Tape

Manufactured from crepe paper with a rubber based, pressure-sensitive adhesive, 2308 is a quality masking tape which offers quick adhesion, good holding power and paint hold-out that resists bleed-through. The crepe paper backing in 2308 is highly conformable and maintains integrity when formed around a corner whilst the tape dispenses evenly with a controlled unwind. 2308 offers high adhesion to steel, is used in short-term temperatures up to 121°C and is on 55mtr rolls (as standard).

3M™ Scotch™ 233+ Premium Tape

233+ is a high performance masking tape which offers excellent sunlight resistance, adhesion, conformability and transfer resistance. This easy to identify green tape has a smooth surface finish and resists lifting/curling whilst simultaneously providing good holding power and clean removal. Manufactured using a proprietary adhesive, 233+ masking tape is often chosen for jobs requiring a high degree of precision, good adhesion and solvent resistance. It is available in 55mtr rolls (as standard).

3M™ 8901 High-Temp Tape

8901 is a high temperature composite bonding tape with a polyester backing and a silicone adhesive. This premium tape is blue in colour and offers long lasting performance in temperatures up to 204°C. It is commonly used in composite and metal bonding, holding parts or vacuum bags during bonding and for masking parts for powder coat painting. It is designed to provide clean removal during masking that involves high temperature or pressure.

3M™ Masking Tapes

Combining 3M's™ world-leading technologies and commitment to quality with AG's service-driven approach to precise, customised components, AG's range of 3M™ Masking Tapes has a product to suit any masking or bonding application.

This page showcases some of our most popular styles and grades of masking tape, with tapes designed for general masking and bonding applications (2212 and 2308) through to the more specialised Scotch™ 233+ premium grade masking tape which offers industry leading resistance to sunlight coupled with excellent conformability and clean removal. The range is rounded out by 8901 composite bonding tape which can handle a variety of bonding applications in high temperature environments.

All tapes featured on this page are readily available from AG in a variety of standard widths. In addition to this, we're also happy to offer custom slit rolls in whatever width best suits your application so that wastage and application time are minimized.

The tapes featured here are complemented by a number of other styles and grades (such as polyimide based high-temperature resistant grade) of masking tapes to form our comprehensive range. For more information on these, or any other masking tapes in AG's comprehensive range, please do not hesitate to contact your local AG branch.
