3M™ 3200 Series Reflective Tape & Sheeting

is a engineering and utility grade reflective material which meets the requirements of ASTM D4956 Type 1. This high quality product is an enclosed lens sheeting with a pressure-sensitive (clear) adhesive backing and an easy release liner. 3200 Series is typically used for non-critical traffic signs and other general purpose applications. AG carries 3M 3200 Series Reflective Tape & Sheeting in White (#3290), Red (#3272) and Yellow (#3271) as standard and can also offer Blue (#3275) and Green (#3277) if desired.

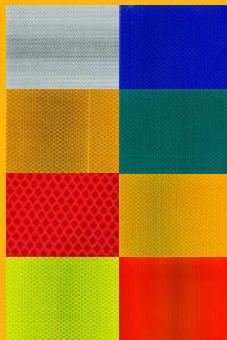

3M™ 3900 Series Reflective Tape & Sheeting

is a high intensity, high quality material designed for long lasting reflectivity and durability. This non-metallised micro-prismatic lens reflective sheet is typically used on traffic control signs, work zone devices and delineators that are to be placed in service vertically. Manufactured with a pressure-sensitive adhesive, 3M High Intensity 3900 Series is available in White (#3930), Yellow (#3931) and Red (#3932) as standard whilst Orange (#3934), Blue #3935), Green (#3937) and Brown (#3939) are also available upon request.

3M™ 4000 Series Diamond Grade Reflective Tape & Sheeting

is a super-high efficiency, full cube retro-reflective material designed for use with traffic control signs and delineators which are exposed to vertical service in critical environments. This grade is designed to exhibit its highest retro-reflective characteristics at medium and short road distances and offers high performance in both day and nighttime environments. 3M 4000 Series Diamond Grade Reflective Sheeting offers long term performance and is available in White (#4090), Yellow (#4091), Red (#4092) and Fluorescent Yellow / Green (#4083) as standard as well as Blue (#4095), Green (#4097), Brown (#4099), Fluorescent Yellow (#4081) and Fluorescent Orange (#4084) upon request.

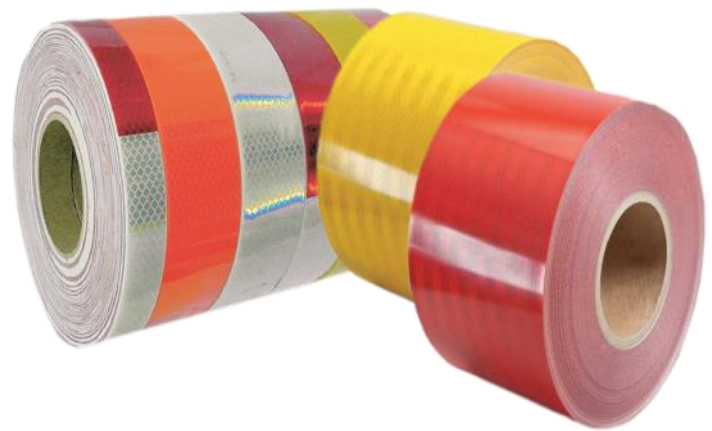

3M Reflective Tape & Sheeting

AG combines our comprehensive range of 3M™ Reflective Tapes and Sheeting with our extensive fabrication capabilities to offer what is likely to be Australia's broadest selection of customised reflective tapes and sheeting.

AG specialises in the precise custom fabrication of this high quality material and are able to offer it in rolls slit to either standard or custom widths (and lengths), kiss-cut for easy application or in pre-cut components that match the exact needs of your application.

Whether it's a single roll, sheet or piece you require, or complex shapes delivered on kiss-cut rolls, AG has the experience, facilities and commitment to service to assist.

For years, AG has offered a wide range of 3M's high quality industrial products. The reflective materials featured on this page represent just a small sample of the more popular grades of this type and of our far larger overall range.

For more information on customisation options available, technical details for these materials or any other product in our ever-expanding range please do not hesitate to contact your local AG office.
