Sure-Pull Packing Extraction Hook Puller

Anybody who has had to repeatedly remove packing using only standard packing extractors knows that it can take a fair amount of effort, often resulting in sore fingers from pulling on the extractor handle, or having it come free suddenly only to smack your hand into the pump or valve body.

The Sure-Pull Packing Extractor has been innovatively designed to take the effort out of removing used packing. It can be used with most standard flexible or rigid packing extractors available from AG.

The Sure-Pull is manufactured from 6061 aluminium ensuring it won't damage your extraction tools. It works by firmly gripping the extraction tool and using a lever action to remove the packing.

Can be used with up to 1/4" flex shaft extractor cables. For more information, contact your local AG.

Packing & O-Ring Extractors

AG offers a range of rigid & flexible packing and O-ring extractors in an assortment of sizes to suit your application. Manufactured from high-quality steel, most flexible extractors also feature a removable and replaceable corkscrew tip. For more information on sizing and availability, talk to one of our experienced sales staff.

Packing Tools and Hardware

Sure-Cut Packing Cutter

The Sure-Cut Packing Cutter tool allows you to easily cut almost all types of packing including pure Teflon, cotton yarn, phenolic yarn, GFO yarn, fibreglass yarn, lead foil, Inconel wire and most composite/Kevlar packings.

The cutting platform guide fence can be adjusted to accommodate for both 90 degree (butt) cuts or 45 degree (skive) cuts allowing for efficient maintenance and reduced down times.

The Sure-Cut Packing Cutter is manufactured from high strength industrial plastic and can also be used to cut most O-ring materials as well as felt and rubber seal strips and materials.

A pocket sharpener and replacement blades are also available from AG upon request.

Note: Sure-cut Packing Cutter is not suitable for 100% Kevlar packing
