

Weicon Copper Paste

Anti-Seize Assembly Pastes & Sprays

Industrial Lubricants

Lubricating & Multi-Functional Sprays & Liquids

Rust & Corrosion Protection

Weicon Copper Paste is a high quality protecting, separating and lubricating agent manufactured from a combination of copper and graphite particles combined with special additives.

Specifically designed for use on highly stressed parts in high temperature environments, Copper Paste can even be deployed in corrosive environments to effectively prevent fretting corrosion and seizing of parts.

Manufactured in Germany, this quality anti seize compound is available in a selection of sizes and pack types.

Key Specifications	
Temperature	-20°C to +1,100°C
Colour	Copper
Base	Mineral Oil
Density @ 20°C	1.1g/cm ³
Coefficient of Friction	0,12μ

Standard Sizes		
30gm	400gm	1kg
85gm	400ml	10kg
120gm	450gm	
200ml	500gm	

Features and Benefits

- Good sliding properties.
- Withstands up to 1,100°C.
- Long lasting performance.
- Contains no sulphur, lead or nickel.
- Can be used to reduce vibration on brake blocks, guides, cams and pins.
- Also used on battery terminals and other connections.
- Suitable for wheel bolts, nuts, compressed air and hydraulic hammers.
- Strong corrosion resistance.
- Easy to use and apply.
