Weicon Flex 310 M Stainless Steel is a specialised variant on our Weicon Flex 310 M elastic adhesive.

This grade has been designed for maximum compatibility with stainless steel, aluminium and other non-ferrous metals and is a non-corrosive adhesive with high bonding strength.

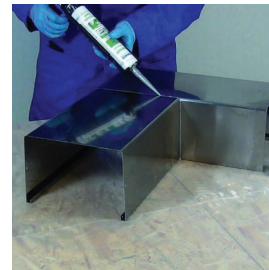

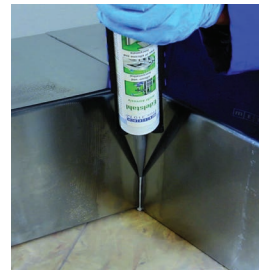

Weicon Flex 310 M Stainless Steel is used for adhesive bonding and the sealing of seams and joints on metal components and equipment. It is also used wherever an adhesive is required that must be colour matched to the surrounding material.

Flex 310 M Stainless Steel is a MS Polymer based adhesive sealant. It is completely free of silicones and solvents.

This quality sealant has been approved by the ISEGA for use in food processing applications.

Key Specifications	
Density	1.06 g/cm ³
Viscosity	Pasty
Cure Speed	2-3mm (first 24 hours)
Skin-Over	10 Minutes
Max. Gap Fill	5mm Deep / 25mm Wide
Shore Hardness	45 Shore A
Temperature Resistance	-40°C to +90°C

Available in 310ml Cartridges.
