Weicon GMK 2410
Rubber Metal Adhesive

Fast Curing, Strong & Permanently Elastic

Weicon GMK 2410 is a solvent based Polychloroprene (CR) contact adhesive used for creating strong and flexible bonds between rubbers and from rubber to metal.

A highly versatile product, Weicon GMK 2410 also bonds cellar rubber (e.g. Neoprene), leather, felt, insulating laminates and boards, textiles, wood and many plastics. After curing (full cure is achieved in approximately 24 hours though contact adhesion is just 10 minutes) the join is resistant to humidity.

Typical Applications:

- Bonding rubber to metal plates, piping, and structural sections
- Bonding rubber profiles, extrusions and door seals in vehicles and utilities
- Fixing insulation material or acoustic insulation foils and sheets to structural components and wall sections
- As an economical, all-round contact adhesive for industrial applications

Available Sizes;

- 185gm Tube
- 300gm Tube
- 700gm Tube
- 5kg Bulk Pack
- 25kg Bulk Pack

Weicon GMK 2410 is used in applications with continuous temperatures between –40ºC and +80ºC (intermittent spikes to 100ºC), Weicon GMK 2410. It is not suitable for bonding expanded polystyrene, polyethylene, polypropylene, flexible PVC foam and artificial PVC leather.

For more information on this high quality, strong and fast curing adhesive please do not hesitate to contact your local AG branch.
