

Weicon Zinc Spray Bright Grade

Weicon Zinc Spray - Bright Grade is a high quality surface coating designed to provide permanent, cathodic corrosive protection for all metal surfaces.

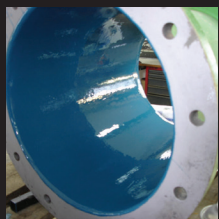

Manufactured from flaky zinc and aluminium pigments with a specially modified alkyd resin, our Bright Zinc Spray is used in both indoor and outdoor environments where it creates a quick drying protective layer that is colour coded to match RAL 9006 ("fresh hot-dip galvanisation").

This long lasting spray has a metal content of around 70% and forms a highly resistant coating which stands up to even extreme weather and environmental influences.

The coating is abrasion resistant and, after being exposed to more than 550 hours of salt spray (in accordance with DIN 53167 or DIN 50021 test standards) showed no signs of corrosion.

Surface & Corrosion Protection

Plastic Metal Epoxy Systems

Multifunctional Sprays

Cleaning & Degreasing

Key Specifications	
Colour	Fresh, Hot Dip Gal.
Temp. Resistance	-50°C to +300°C
Pigment Purity	99.9% Zinc 99.9% Aluminium
% of Metal in Film	70% (Approx.)
Salt Spray Test	> 240 Hours
Mandrel Bend	No Hair Cracking
Avg. Consumption (w/ 1.5 cross coats)	150ml / m ² (Approx.)

Standard Sizes

- 400ml Standard Aerosols
