

Weicon Chewing Gum Remover Spray

Weicon Chewing Gum Remover Spray is the fast and easy way of removing old chewing gum or modelling clay residues. Gum or clay remnants sprayed with Chewing Gum Remover will be frozen and have their adhesive bonds significantly weakened. This will allow them to be easily and immediately removed without damaging the surface to which they had been adhered.

Chewing Gum Remover Spray is used wherever old chewing gum residues are found. Example include upholstered furniture, bus seats, school seats and tables, concert halls, cinemas, all kinds of textile floor coatings and elastic or rigid floor coatings made of wood, stone, PVC or linoleum.

Each can of Chewing Gum Remover Spray ships with a plastic spatula to make removal simple and hassle free.

Properties

Colour	Colourless
Odour	Almost Odourless
Temperature Resistance	---
Minimum Shelf Life	24 Months

Preparation of the Surface

No special surface pre-treatment is required.

Processing

Hold can upright and do not shake before use. Spray on Chewing Gum Remover from a short distance until the freezing effect can be seen. Then, remove the residues from the surface using the supplied spatula. Clean textile coatings with a vacuum cleaner or a brush after use.

Caution: There is a danger of hypothermia in the event of direct contact between Freeze Spray and the skin.

Storage

Cans of Chewing Gum Remover Spray should be stored away from direct sunlight and not exposed to temperatures exceeding 50°C. Minimum shelf life is 24 months.

Availability

Weicon Chewing Gum Remover Spray is available in 400ml aerosol cans.
